"One Step Ahead"

About the Company

Morton is the first anesthesia products and accessories manufacturer in Turkey. Morton Medical has been established in 1990 to design and produce medical products in Izmir, Turkey. She is involved in production and design of many disposable and reusable items used in medicinal processes like anesthesia, ventilation, reanimation and many other fields.

Having an extensive product portfolio ascending from a reputable Professional experience ; Morton Medical improves product variability through adding new products and models in her portfolio each year.

Production processes which are monitored and managed according ISO 9001, ISO 13485 and CE Standards are executed in

Class 10.000 and Class 100.000 clean rooms in the new facility of Morton Medical, incorporating a high capacity sterilization facility. Thus Morton Medical defines continuous and sustainable quality improvement as her primary objective.

Starting from 1990 up to today Morton Medical has experienced a constant growth with preference and appreciation of countless hospital management and healthcare professionals in Turkey and 54 countries around the world.

Sustaining and strengthening the brand appreciation of hospital managements, health professionals and producers served as an OEM producer is the prime foundation of strategic plans of Morton Medical.

Capacity for OEM Production According to CE and FDA Standards

We offer OEM production facilities to renowned producers in the global area. Own-Brand Labelling, Bulk Production and other production options are available and applied. Morton Medical executes fully integrated production procedures with the following machine park:

Injection:

We have 8 different tones injection machines.

Sterilization:

Ethylene Oxide Sterilization

Clean Room:

10.000 and 100.000 class cleanrooms

Molding:

Capacity design and produce our own moulds with competitive prices.

The production allows for the following product range:

Anesthesia, Infusion, Suction, Drainage and Lots of disposable and reusable items.

Production procedures applied are designed, inspected and certified according to ISO, CE, FDA standards. We provide full transparency and encourage contractor inspection during all stages.

Warehousing & Distribution Center Services:

We are able to provide cost effective warehousing solutions to OEM partners for delivery optimization and create value added distribution services for local and export markets.

OEM partners may hold inventory on their products produced elsewhere so that they can execute full orders in targeted markets, cut on delivery costs and ensure client satisfaction.

Export Logistics Services:

The production facilities are located in the junction point of central Mediterranean, enabling full coverage of land, air and sea transport routes, therefore we offer to provide fast, economic and flexible export logistics for Europe, Middle East, Africa and ex-Soviet markets. Currently trade operations are administered in 54 countries in the region.

Advantageous import tax tariffs:

For almost all the export markets in Europe, Middle East, Africa and ex-Soviet, OEM partners enjoy advantageous import tariff rates. For Europe import tax is free.
